

Employment Services

Social Bridge consults with companies that want to hire skilled adults with disabilities to work part-time, or full time in professional and technology sector positions.

When companies *have an existing need or opportunity* we assess any sensory, social, or organizational accommodations that may increase employee productivity and inclusion in the workplace.

We also *develop new jobs by collaborating with leadership* to understand company's workflow concerns to create a new job that would be optimized if performed by individuals with Asperger's or Autism Spectrum Disorders.

Our Process

1. Assist with structuring job opportunities or developing new roles
2. Promote the position to find a selection of qualified candidates
3. Design an interview that captures the knowledge and technical skills of candidates for hiring managers
4. Prepare candidates with support before and during the interview process
5. Providing ongoing consultation for the new employee, managers, and coworkers.
